

## Dates of important chemical events of 50, 100, 150 ... years ago from 2000

### Analytical Chemistry

#### 700 years ago

1300

- *Arnoldus de Villanova* uses litmus as a chemical agents

#### 350 years ago

1650

- *Johann Rudolph Glauber* practises chemical analyses on the wet way e.g. preparing precipitations with ammonia or potash solutions. Here also is an object the insolubility of silver chloride and the blue colouring of copper solutions with ammonia

#### 150 years ago

1850

- *Karl Leonhard Heinfich Schwarz* proposes a titrimetric method to estimate chemical trade products

#### 50 years ago

1950

- *B Wurzschnitt* renders organic substances soluble in crucibles of pure nickel with sodium peroxide and a drop of glycol
